

# Budget Unit Brief

## FY 2017

## DOT - Field Facility Deferred Maintenance

### Purpose and History

Activities funded with this appropriation include renovation and replacement of aging facilities operated by the Iowa Department of Transportation (DOT). The DOT maintains 1,090 buildings totaling more than 4.2 million square feet at 218 sites. The DOT defers maintenance on these facilities as long as possible and anticipates continued demand to replace and renovate facilities.

Examples of recent field facility deferred maintenance repair projects funded by this appropriation include replacement of several hoop buildings across the state, consolidation and remodeling of District 6 offices, an addition to the Grimes District Operations Manager's Office to relocate the Des Moines Resident Construction Office from the Des Moines North site, purchase of leased offices, and building improvements for the highway maintenance garage in Martensdale.

### State Funding

The DOT receives an appropriation from the Primary Road Fund (PRF) for deferred maintenance projects at various statewide field facilities. The annual amount requested by the DOT for these reimbursements is based on actual expenditures from previous years and identified need at field facilities. This appropriation will be an ongoing budget request by the DOT.

**Revised September 7, 2016**
